Montana Medical Association Supports Prescription Medication Program

Montana Residents Can Save Up To 75 Percent on Prescription Medications

Helena – Montanans continue to face rising costs for their prescription medications. Physicians in the state recognize increasing medication costs can be a barrier to following treatment regimens. For this reason, the Montana Medical Association is partnering with the Montana Rx Card to provide a FREE prescription medication assistance program for members, their patients, employees and all Montana residents.

“MMA member physicians are happy to endorse this partnership to make prescription medications affordable for more of their patients,” said MMA Chief Executive Officer, Jean Branscum.

The Montana Rx Card was launched in 2011 to make prescription medications more affordable for the uninsured and underinsured. Since its inception, the program has saved Montana resident’s \$17,500,000. The card may be used for savings of up to 75 percent on prescription medications at more than 68,000 pharmacies nationwide.

This free drug card offers discounts on more than 20,000 brand name and generic prescriptions for individuals without prescription coverage. Individuals who have prescription drug coverage may still qualify and receive discounts on medications not covered by their insurance plan. Montana residents can search drug pricing, locate participating pharmacies and create a free card by visiting mmaoffice.org or montanarxcard.com.

The mission of the Montana Medical Association is to serve our physician members as an advocate for the medical profession, quality patient care, and the health of Montana citizens.
